Summary

Computer Science graduate with hands-on experience in machine learning, deep learning, NLP, LLM applications, and retrieval-augmented generation. Experienced in building practical AI applications using Python and modern machine learning frameworks.

Skills

Python, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, NLP, Transformers, BERT, LLMs, RAG, FAISS, ChromaDB, SQL, Git, GitHub, Streamlit

Projects

Resume-Job Matching AI: Built a semantic matching system that compares resumes with job descriptions using text embeddings and cosine similarity.

PDF Q&A; RAG Chatbot: Built a retrieval-augmented generation application that extracts PDF text, creates chunks, stores embeddings in ChromaDB, retrieves relevant context, and generates answers using an LLM.

Student Performance Prediction: Developed a machine learning model using Python and Scikit-learn to predict student performance and evaluated the model using MAE, MSE, and R^2 .

Education

B.Tech in Computer Science and Engineering | 2026

Certifications

Machine Learning Fundamentals | Deep Learning with TensorFlow | Generative AI and LLM Applications
